upm-globalhealth-conference@up.edu.ph

Paper or Poster Title

(Maximum Two Rows)

First author's first name initials and family name, Second author's first name initials and family name, Third author's first name initials and family name, ...
Authors' affiliation, City, Country

A. Background

Briefly and clearly describe the principle of the study. Why was the study conducted?

B. Methods

Detail the methods and processes employed in the study. What did you do?

C. Results

Describe the precise findings of the study; promises of results "to be determined" are not acceptable. Describe what you found and include data.

D. Conclusions

Describe logically sound conclusions and reliable inferences drawn from the study results. Why are the study's findings important?
